OBJECTIVE:

The Cooked-Food Supply Chain project integrates webapplication and ERP and AIdriven for efficient urban food waste management.

ABSTRACT:

The innovative Cooked-Food Supply Chain project, which utilizes ERP and incorporates AI-driven search to locate local bodies, is aimed at enhancing community engagement. Urban food waste is addressed as donors are seamlessly connected to those in need through the platform's cost-effective web application, ensuring efficient supply chain management. User inquiries are assisted by an intuitive chatbot, while engagement is fostered by community features and notifications. User experience, transparency, and accountability are enhanced by robust authentication and feedback mechanisms. The Cooked- Food Supply Chain project provides a comprehensive solution to the challenges of urban food waste.
